

Supermortgage price sheet

Every action the platform's agents take on a mortgage, and the tokens each one consumes. Version 1.0 · September 28, 2026 · for team review.

1 token = \$0.01. A customer commits to an annual token pool and is invoiced monthly on what its loans consume.

Who pays. The servicer, bank or originator that runs the loan on Supermortgage. Homeowners pay nothing.

Two denominations. Section A, the standard servicing cycle, is priced per \$100,000 of unpaid principal balance, so a standard loan consumes 25,000 tokens a year (25 basis points) at any loan size. Sections B, C and D are flat tokens per action.

Standard loan. Current, escrowed, fixed rate, no mortgage insurance.

How the numbers are set. The standard cycle equals the 25 basis-point servicing fee a Fannie Mae servicer already receives. The servicing rows are set to what the market charges a subservicer for the same work on a \$230,000 balance; the self-improving mortgage carries the remainder.

Outside this sheet. Third-party costs: DU casefile fees, credit reports, appraisals, title, flood certification, mortgage insurance premiums, recording fees and warehouse interest.

† A licensed or dual-control person is in the loop today (MLO of record, underwriting reviewer, funding approver, portal operator, signing officer, BSA officer). Numbers in parentheses are process references in the platform specification.

A. Standard servicing cycle — sums to 25 basis points

Tokens per \$100,000 of balance. Monthly rows are billed per loan-month; the daily rows run every morning and are billed once a month.

Action (process)	Fires	Tokens per \$100K
Self-improving mortgage: daily rate review, refinance readiness kept current, an offer when the borrower benefits (20.1, 33.3)	daily; per loan-month	1,750
Payment processed and applied: cashiering cycle, ACH and lockbox, allocation (2.1, 2.3, 35.5)	daily; per loan-month	125
Investor report and remittance to Fannie Mae; custodial account reconciliation (5.1, 5.2, 6.3, 6.4)	per loan-month	75
Tax, insurance and flood monitoring; escrow disbursements (9.1, 9.6, 3.7)	per loan-month	50
Periodic statement and household communications (7.1, 32.8)	per loan-month	50
Credit bureau furnishing, Metro 2 (8.1)	per loan-month	25
Monthly subtotal		2,075 × 12 = 24,900
Annual escrow analysis and statement, surplus and shortage (3.2–3.6)	per loan-year	60
Year-end tax reporting, Forms 1098 and 1099-INT (35.4)	per loan-year	40
Standard loan, one year		25,000 = \$250 = 25 bp

On top of the cycle, when the loan has the feature

Action (process)	Fires	Tokens per \$100K
Mortgage insurance administration: 78% and midpoint termination checks, annual disclosure (10.2–10.4)	per loan-month	25
Adjustable-rate administration: adjustment notices (7.2, 7.3)	per loan-month	25
Offer touch to a homeowner: e-mail, text or AI voice through consent and do-not-call gates (20.2)	per touch, flat	100

A loan whose escrow is waived skips the annual analysis row (24,940 a year). A monitored loan on a partner's book consumes the self-improving mortgage row and offer touches from the day it is loaded; the servicing rows start the day the loan boards.

B. Origination — one run per closed loan, flat

A standard refinance run is **60,000 tokens (\$600)**: rate-and-term refinance, value acceptance in place of an appraisal, one borrower, eNote signed by remote online notarization, dry-funding state, seven days on the warehouse line. A purchase run is 58,500 (60,000 with mortgage insurance): it swaps rescission and the prior-loan close-out for the appraisal review. The run price covers every action below at the standard quantity, however many times the agent repeats one; only the extras in the second table are metered on top. Billed to the originator of record for the new loan; on a partner recapture it is recovered from purchase proceeds in the settlement waterfall (27.2), the same way third-party costs are.

Action included in the run (process)	Tokens each	Standard run
Lead intake: identity, E-SIGN and TCPA consents, soft credit pull, pre-qualification, six-item detection † (20.3)	2,000	2,000
Rate quote (20.4)	100	200 (×2)
Application: conversational Form 1003, MLO-of-record review † (21.1)	3,000	3,000
Loan Estimate (21.2)	1,000	1,000
Companion early disclosures (21.3)	500	500
Rate lock † (21.4)	1,000	1,000
Revised Loan Estimate and tolerance test (21.5)	500	1,000 (×2)
Document classified, extracted, integrity- and freshness-checked (22.1)	100	1,000 (×10)
Needs-list cycle (22.1)	200	400 (×2)
Credit pull and analysis (22.2)	1,000	1,000
Undisclosed-debt monitoring and pre-close refresh (22.2)	500	500
Income and employment verified, including verbal VOE by AI voice (22.3)	1,500	1,500
Asset account verified (22.4)	500	500
Liabilities and debt-to-income computed (22.5)	200	400 (×2)
Identity, fraud, OFAC and Red Flags screen (22.6)	300	600 (×2)
DU submission: assemble, preflight, submit (23.1, 23.5–23.7)	1,500	4,500 (×3)
Findings interpreted, conditions opened (23.2)	500	1,500 (×3)
Conditional approval issued (23.3)	1,000	1,000
Condition cleared (23.3)	150	2,100 (×14)
Clear to close (23.3)	1,000	1,000
ATR/QM, HPML, HOEPA and state high-cost determination (23.4)	200	800 (×4)
Valuation ordered (24.1)	500	500
Property eligibility (24.3)	500	500
Title file: commitment, curative, agent vetting, closing protection letter, wire verification (24.4)	2,500	2,500
Existing lien paid off or resubordinated (24.4)	500	500
Flood determination and notice; hazard evidence (24.5)	500	500
Compliance test run and gate (25.1)	200	1,400 (×7)
Closing Disclosure (25.2)	1,500	1,500
Uniform Closing Dataset submitted (25.2)	300	300
Rescission administered (25.3)	500	500
Closing-package and post-closing notices (25.4)	500	500
Closing document set, document QC, closing instructions (26.1)	2,500	2,500
Signing session (26.2)	2,000	2,000
eNote sealed, registered, Secured Party named (26.2)	750	750
eRecording (26.2)	500	500

Action included in the run (process)	Tokens each	Standard run
Funding: conditions, worksheet, wire, release † (26.3)	3,000	3,000
Post-closing collateral: MERS registration, custody, trailing documents (26.4)	1,500	1,500
Warehouse advance † (27.1)	1,000	1,000
Warehouse day: accrual, aging, borrowing base (27.1)	50	350 (×7)
Purchase settlement, gain on sale, MSR hand-off (27.2)	2,000	2,000
Commitment (29.1)	500	500
ULDD build, EarlyCheck, package freeze (29.3)	1,000	1,000
Loan Delivery, custodian certification, purchase advice † (29.4)	3,500	3,500
HMDA record (28.3)	200	200
Boarded onto servicing at funding (30.2)	1,500	1,500
Escrow account established (30.3)	500	500
Fannie Mae post-purchase setup (30.1)	1,000	1,000
First-90-days hand-off (30.4)	1,500	1,500
Prior loan closed out: payoff, lien release †, escrow refund (35.10)	2,500	2,500
Standard refinance run		60,000 = \$600

Extras, metered per action on top of the run

Action (process)	Unit	Tokens
Lock extension, relock or float-down (21.4)	per event	500
Tolerance cure and refund (21.5)	per cure	1,000
Notice of incompleteness, counteroffer or denial † (21.6)	per notice	2,000
Deposit or gift sourced (22.4)	per item	300
Additional borrower: screens, credit, income and assets (22.2–22.6)	per borrower	3,000
Fraud investigation (22.6)	per investigation	5,000
Appraisal reviewed, UCDP and Collateral Underwriter, copy delivered (24.2)	per report	1,500
Reconsideration of value † (24.2)	per request	2,500
Condo or PUD project review † (24.3)	per project	2,000
Mortgage insurance ordered and activated (24.6)	per order	1,500
Corrected Closing Disclosure after consummation (25.2)	per event	1,000
Rescission or funding unwind † (25.3, 26.3)	per unwind	5,000
Warehouse day beyond the seventh (27.1)	per day	50
Commitment modification, pair-off or extension † (29.1)	per event	250
Post-delivery correction or adjustment † (29.4, 27.2)	per event	1,500
Prefunding quality-control review † (28.1)	per selected loan	3,000
Post-closing quality-control review † (28.2)	per selected loan	5,000
Suspicious-activity, OFAC or Fannie Mae self-report † (28.4)	per case	10,000

C. Exceptions on a performing loan — flat

Action (process)	Unit	Tokens
Partial payment or suspense resolved (2.2)	per event	500
Late charge assessed (2.7)	per event	100

Action (process)	Unit	Tokens
Unidentified or unapplied funds resolved (6.5)	per receipt	500
Escrow waiver request (3.8)	per request	500
Notice of Error, Request for Information or complaint (4.1, 4.2, 4.5)	per case	2,500
Successor in interest (4.4)	per case	2,500
Credit dispute through e-OSCAR (8.2)	per dispute	1,000
Force-placed insurance notice (9.2–9.4)	per notice	500
Force-placed insurance cancellation and refund (9.5)	per event	500
Loss draft or insurance claim (9.7)	per claim	5,000
Mortgage insurance cancellation request, refund or denial (10.1, 10.5, 10.6)	per request	1,000
Payoff statement (16.1)	per request	250
Payoff processed: proceeds remitted, lien released †, MERS deactivated (16.2–16.4)	per payoff	2,500
Servicing transfer in † (1.1–1.7)	per loan	2,500
Servicing transfer out † (17.1–17.4)	per loan	2,500

D. Distressed loan — flat, on top of the cycle

Action (process)	Unit	Tokens
Delinquent loan-month: counters, default case progressed daily, delinquent status reported (35.9, 5.7)	per loan-month	1,000
Written early-intervention notice (11.2)	per notice	500
Right-party contact achieved; attempts by AI voice and text under FDCPA gates included (11.1, 11.3, 11.4)	per episode	3,000
Continuity-of-contact personnel assigned (4.3)	per episode	500
Imminent-default evaluation (11.5)	per evaluation	1,500
Property inspection (9.8)	per inspection	500
Property preservation action (9.9)	per action	1,000
Stop delinquency advance or guaranty-fee relief filed (5.4, 5.5)	per event	500
Loss-mitigation application acknowledged (12.1)	per application	500
Complete-application evaluation † (12.2)	per evaluation	5,000
Appeal handled (12.3)	per appeal	3,000
Forbearance plan (12.4)	per plan	5,000
Repayment plan (12.5)	per plan	5,000
Payment deferral, including disaster deferral (12.6, 12.7)	per deferral	10,000
Flex Modification completed, trial through permanent (12.8, 2.6)	per modification	30,000
Short sale or Mortgage Release completed (12.9)	per liquidation	30,000
Pre-referral review: 120-day and dual-tracking checks (13.1, 13.2, 13.4)	per review	3,000
Foreclosure referral (13.3)	per referral	5,000
Foreclosure case-month: milestones, allowable timeframes, compensatory-fee tracking, law-firm reconciliation (13.5, 13.6, 35.9)	per case-month	2,500
Environmental hazard or non-routine litigation (13.7)	per event	5,000
SCRA protection or interest cap (13.8, 13.9)	per request	2,000
Liquidation reported to Fannie Mae (5.3)	per event	1,000
Bankruptcy filing: case opened, reporting suspended, proof of claim prepared † (14.1, 14.4)	per filing	7,500

Action (process)	Unit	Tokens
Bankruptcy case-month: docket sync, monitoring, statement in bankruptcy (14.1, 14.3)	per case-month	2,000
Payment change notice under Rule 3002.1 (14.2)	per notice	1,000
REOgram or conveyance to Fannie Mae (15.1)	per event	5,000
Expense reimbursement submission (15.2)	per submission	2,500
Mortgage insurance claim (15.3)	per claim	5,000
Delinquency advance reimbursement, Form 4828 (15.4)	per submission	2,500
Repurchase reported (5.6)	per event	1,000

E. What it adds up to

Example	Tokens	Dollars
\$100,000 of balance, one standard year	25,000	\$250
A \$230,000 standard loan, one year: servicing rows \$92, self-improving mortgage \$483	57,500	\$575
A standard refinance run	60,000	\$600
A loan 90 days delinquent that cures through a Flex Modification: three delinquent months, one written notice, right-party contact, continuity of contact, one inspection, application, evaluation, modification (on top of the cycle)	43,000	\$430
A \$6 billion servicing book, one standard year	1.5 billion	\$15 million
